ROBERTS & MANDER STOVE CO.

PHILADELPHIA

Manufacturing Plants:

PHILADELPHIA *and* HATBORO, PA.

BIRDSEYE VIEW OF OUR NEW PLANT AT HATBORO, PA.

The Plant

THE above plant of the Roberts & Mander Stove Company, situated about twenty miles north of Philadelphia, houses the modern equipment essential to the manufacture of Quality Gas Ranges and Appliances.

An up-to-date foundry, enameling plant and one of the largest mounting floors of its kind make up the major part of this plant.

Year by year has shown a constant improvement in our product until it is generally recognized that Quality Gas Ranges represent the highest standard of design, construction and workmanship.

The Roberts & Mander Stove Company extend to anyone interested an invitation to visit this modern gas range plant when you are in Philadelphia.

The Service

ENDEAVORING at all times to maintain a high standard of service, the trucks of the Roberts & Mander Stove Company are traveling over the various highways day and night.

A fleet of 16 trucks similar to the one shown above make it possible for this company to give over-night service to our customers within a radius of 100 to 120 miles from Philadelphia.

To and from the wharves and railroad depots with this fleet, our service has been raised to a high level, so that shipments to distant points are made earlier than in the past.

The Quality Line

"All That the Name Implies"

WE believe that we are offering in this catalogue the most complete line of gas ranges manufactured. Improvements in design and material that give the best results are embodied in each appliance.

The specifications and requirements of the leading gas companies and organizations are strictly followed, producing a recognized standard of value.

Nothing less than 24-gauge steel, and in many instances 18-gauge, is used in the sheet metal parts.

The Quality line has been standardized from its inception, having the distinct advantage of interchangeable parts.

Quality castings are dipped and afterwards baked, producing an ebonized japan finish, superior to anything that has been attempted in the past.

This Metal Tag or Name Plate which is attached to Quality Gas Ranges and Appliances is a guarantee that they are constructed in strict compliance with the standard specifications of the American Gas Association, Incorporated, which requires standard weight sheet metal parts, burners of economical design, extra heavy manifolds, proper insulation of ovens, gas cocks so designed to take wear and prevent leaks, and many other features necessary in the manufacture of dependable gas ranges and appliances.

A Thing of
Beauty is a Joy
Forever

Terms

Terms:—Unless otherwise quoted, 2 per cent discount for cash in 10 days; net cash, 30 days from date of invoice.

All goods shipped F. O. B. Philadelphia, Pa. On all ranges we will allow freight to destination where it does not exceed 25 cents per 100 pounds.

All claims against invoices must be made within ten days after receipt of goods.

Accounts not paid at maturity are subject to sight draft without notice.

All accounts not paid when due will have interest added at the rate of 6 per cent per annum from date when same became due until date of settlement.

Bankruptcy, assignment or transfer of stock or business, or encumbrances of any nature, accounts shall become due and payable at once.

All orders received by the Roberts & Mander Stove Company are contingent upon strikes, accidents, acts or demands of the United States Government upon us, railroads, war, public enemy, or inability to secure materials, or any other cause beyond our control.

All quotations and prices are subject to change without notice. All accounts are payable in funds at par in Philadelphia, without allowance for exchange or express charges.

Stoves or appliances returned, except by written agreement, will not be accepted. No stoves or appliances sent on consignment.

Order instructions:—Always order by name, number and finish. Specify kind of gas to be used.

Code:—We use Bentley's Complete Phrase (5 letter) Code. Code words are given on each page for range or appliance as shown. For additional code words see page 7.

Shipments

We ship at "Owner's Risk Released," thus giving our customers the benefit of the lowest freight rate. Any goods we ship become the property of the buyer as soon as delivered to the Transportation Company, and the Transportation Company is responsible to him for safe delivery of the goods. Every assistance in our power will be cheerfully rendered, in case it becomes necessary to trace lost goods or to collect damages, but in no instance shall the settlement with us be subject to the arrival or non-arrival of goods at their place of destination or to claim for damages of goods in transit.

In the absence of special shipping directions, we will use our best judgment in the choice of route

Private Code

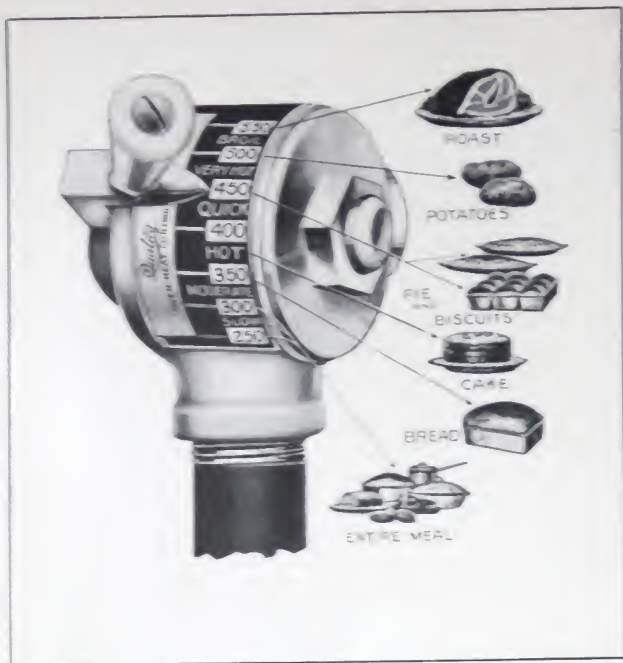

THE following code words are used in connection with Bentley's Complete Phrase (5 letter) Code and apply on all ranges as noted in catalogue. The last code word has reference to the cookers and single ovens only, as noted:

YATOP	Right Oven.
YATPO	Right Oven with Glass Door and Thermometer.
YATRY	Right Oven with Enamel Oven Linings.
YATYR	Right Oven with Oven Heat Control.
YAUCY	Right Oven with Cabinet Base.
YAUHD	Right Oven with Glass Door and Thermometer and Enamel Linings.
YAUJF	Right Oven with Glass Door and Thermometer and Oven Heat Control.
YAURN	Right Oven with Glass Door and Thermometer and Cabinet Base.
YAUSP	Right Oven with Glass Door and Thermometer, Enamel Linings and Oven Heat Control.
YAVAM	Right Oven with Glass Door and Thermometer, Enamel Linings and Cabinet Base.
YAVEN	Right Oven with Glass Door and Thermometer, Enamel Linings, Oven Heat Control and Cabinet Base.
YAVIP	Right Oven with Enamel Linings and Oven Heat Control.
YAVMA	Right Oven with Enamel Linings, Oven Heat Control and Cabinet Base.
YAVNE	Right Oven with Enamel Linings and Cabinet Base.
YAVSY	Right Oven with Cabinet Base and Oven Heat Control.
YAVUR	Left Oven.
YAVYS	Left Oven with Glass Door and Thermometer.
YAWAN	Left Oven with Enamel Oven Linings.
YAWEP	Left Oven with Oven Heat Control.
YAWNA	Left Oven with Cabinet Base.
YAWOR	Left Oven with Glass Door and Thermometer and Enamel Linings.
YAWPE	Left Oven with Glass Door and Thermometer and Oven Heat Control.
YAWRO	Left Oven with Glass Door and Thermometer and Cabinet Base.
YAWTY	Left Oven with Glass Door and Thermometer, Enamel Linings and Oven Heat Control.
YAWUS	Left Oven with Glass Door and Thermometer, Enamel Linings and Cabinet Base.
YAWYT	Left Oven with Glass Door and Thermometer, Enamel Linings, Oven Heat Control and Cabinet Base.
YAYAP	Left Oven with Enamel Linings and Oven Heat Control.
YAYIR	Left Oven with Enamel Linings, Oven Heat Control and Cabinet Base.
YAYLJ	Left Oven with Enamel Linings and Cabinet Base.
YAYMK	Left Oven with Cabinet Base and Oven Heat Control.

Reference to the No. 1839-GE and No. 1829-GE, the regular equipment includes a plate shelf, but if the plate shelf is not to be included, code as follows:

YAYOS The shelf is not to be included.

THE USE OF CAPITAL LETTERS WILL MINIMIZE ERRORS
AT TELEGRAPH OFFICE.

THE Robertshaw Oven Heat Control is constructed according to the oldest and simplest method of Thermostat construction, with the refinements and improvements of later years. The thermostatic elements, copper and carbon, will not deteriorate to the slightest degree on cooking temperatures.

Valve design is constructed on simple lines. It is sturdy and reliable, will withstand rough usage and shipping. In severe competitive tests it has proved to be extremely accurate and sensitive; being of the direct lift type (without levers), acts without any lost motion, and the changes in actual oven temperatures are quickly and correctly registered.

THE Robertshaw Oven Heat Control is attractive, durable, practical and absolutely safe. But one hand is required to operate the adjustment handle, securing unlimited number of temperatures; no elaborate instructions necessary. The valve is accessible, easy to clean and adjust, and is protected with a by-pass pilot flame and an independent pilot light which remains lighted when the oven is in use.

All Quality Cabinet Ranges in Regular, Half Enamel or Full Enamel Finish can be equipped with the Oven Heat Control.

List Price, with Range, \$20.00

Showing location and method of installing the Robertshaw Oven Heat Control

The Quality Cabinet Base

A QUALITY Cabinet Range equipped with the cabinet base is more than just a gas range. Everyone is attracted by the beauty and wonderful convenience of a base receptacle for pots and pans. In small kitchens this base utilizes the space beneath the gas range which heretofore could not be used.

Quality Full Enamel Cabinet Base. White Enamel Sides, Door Panels and four legs. Main frames heavily Nickel Plated.

List Prices on Cabinet Bases as follows:

	White Enamel Finish Ordered with Range	White Enamel Finish Ordered Separately		Half Enamel or Plain Finish Ordered With Range	Half Enamel or Plain Finish Ordered Separately

Half Enamel Cabinet Base. White Enamel Door Panels and four legs. Front of main frames heavily Nickel Plated. Balance of Base Baked Salin Ebony Japan Finish.

Quality Plain Finish Cabinet Base. White Enamel Door Panels and four legs. Body and main frames Baked Salin Ebony Japan Finish.

IMPORTANT: Prices do not permit return of present range legs for credit.

Quality Enamel Oven Linings

QUALITY Enamel Oven Linings are made to last longer. It is usually at this point that the range first starts to show signs of wear.

These linings are made of 24-gauge iron which is dipped in a liquid vitreous enamel and fused in a furnace at 1600 degrees. As the heat of any gas range oven rarely exceeds 600 degrees, it is easily understood that there can be no danger of cracking due to heat.

List prices on Enamel Oven Linings ordered with Range, as follows:

Nos. 1838 or 1938 Series	}\$4.25
Nos. 1837 or 1937 Series	
Nos. 2136 or 1936 Series	
Nos. 1922-CE or 1922-C	}\$8.00

Nos. 722-CE or 722-C	
Nos. 744-CE or 744-C	

The above illustration shows an Enamel Oven Lining installation. The combination of blue enamel stippled in white gives a bright and sparkling appearance to the oven.

Quality Glass Oven Door and Thermometer

THIS door can be furnished in either gray enamel or nickel finish.

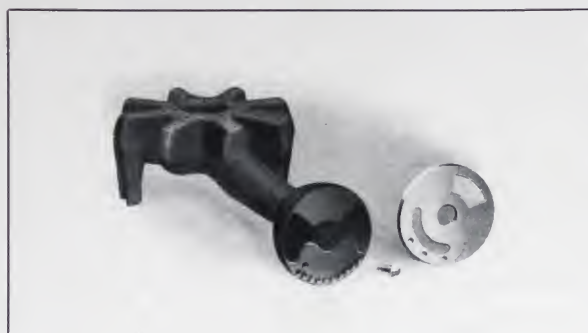

A Quality Gas Range equipped with Glass Oven Door and Thermometer makes it possible to see how the food is cooking inside of the oven without opening the door and allowing cold air to enter, and, as the modern cook books give the temperatures at which foods should be cooked, the thermometer will indicate the temperature of the oven.

This door can be furnished for Quality Ranges now in use.

List Price (either finish) ordered with Range, \$6.65—Code YAYUT.

The above illustration shows a Glass Oven Door installation

THE drilled top burners are star-shaped, cast in one piece and made under patent of September 6, 1904, and re-designed to conform to the proportions of burner construction as set forth in the revised 1926 A. G. A. specifications. This new type of burner shows the highest efficiency, and is the only type which will burn without signs of smothering, although close to the vessel.

Our improved air shutter (patented May 14, 1915) has seven positive adjustments, is easily operated without entirely removing the set bolt, but cannot be moved until the bolt is "unscrewed" some distance, thus preventing a change of adjustment by loosening of bolt caused by expansion and contraction of burner and jar to range.

The gas cocks used are extra heavy, with spring washers to take up all wear, and are of the latest approved specification type. When desired we furnish the same style of cock with adjustable orifice, especially suited for various pressures in the same locality. Extra heavy $\frac{3}{4}$ -inch manifold pipe is an additional strength for gas cock threads and general rigidity.

All white enamel sheet metal parts are stamped from heavy gauge Armco iron and are enameled by the most modern method, and if handled with ordinary care will last indefinitely.

On each enamel range a sticker contains this advice: "Porcelain enamel is breakable and must be carefully handled. It cannot be guaranteed, and, therefore, will not be replaced free of charge. Keep porcelain broiler pan out of the broiler when not in use."

Quality Gas Ranges are neither over-built to justify a price nor under-built to meet a price. They are the meeting place of quality and price. They present the greatest value, plus best service.

Quality Semi-Closed Smooth Top for Quality Gas Ranges

THE convenience of a smooth or level top for gas ranges is especially appreciated by users of coal ranges, and for those who are willing to use a little more gas than is necessary with the usual open-top grate, we recommend the semi-closed smooth top as shown.

No. 92 Toaster

No. 92

Quality Gas Toaster

TURNS the toast without handling. The removable inverted V-shaped Perforated "Everdur" Metal Heat Baffle quickly becomes incandescent and will toast eight to ten slices of bread in two to three minutes. The new "Everdur" Metal Baffle is non-corrosive and is a decided improvement, insuring long, satisfactory service.

Burner with special Mixing Tube consumes about 30 cubic feet of gas per hour.

To insure best results, be sure your supply of gas is adequate.

DIMENSIONS, ETC.

Perforated "Everdur" Metal Heat Baffle, sold separately—List Price \$3.50—Code YEZVA

A BATTERY of Toasters as shown can produce twenty-four to thirty-two slices of perfect toast at one time within two or three minutes. The average hotel or large restaurant will require from three to six sections.

The No. 92 Quality Toaster is well constructed and finished in Black Japan castings; the pans are of patent planished steel.

The radiant heat is produced by gas on the perforated "Everdur" metal heat baffle, which is non-corrosive and which becomes incandescent, giving out heat such as that of red-hot coals, producing perfect toast.

A battery of Toasters in active service, giving perfect toast in large quantities

Ventilating Wall Canopy "C"

A DOUBLE-HIPPED Canopy, made of Polished Blued Steel Sheets, with Wide Nickel Band Trimmings. Special sizes to order.

No. 215

No. 130

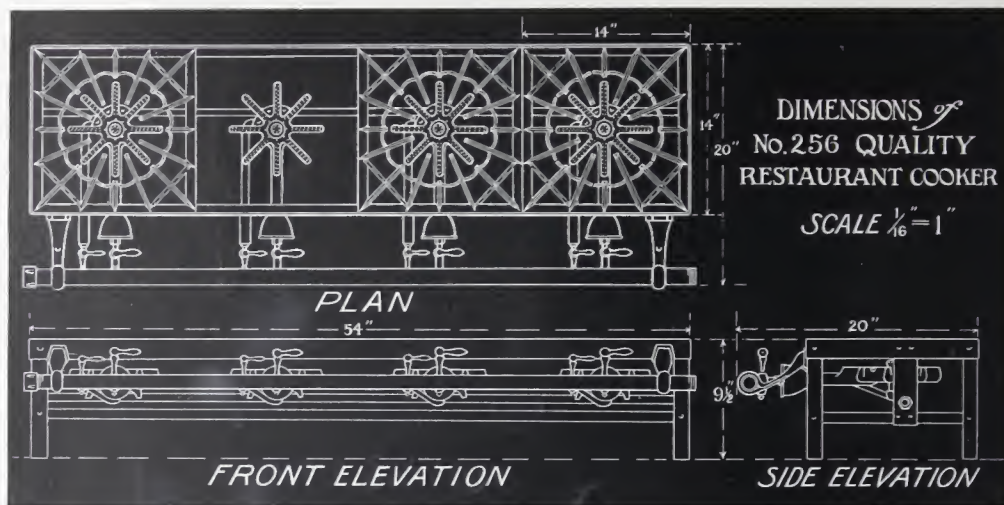

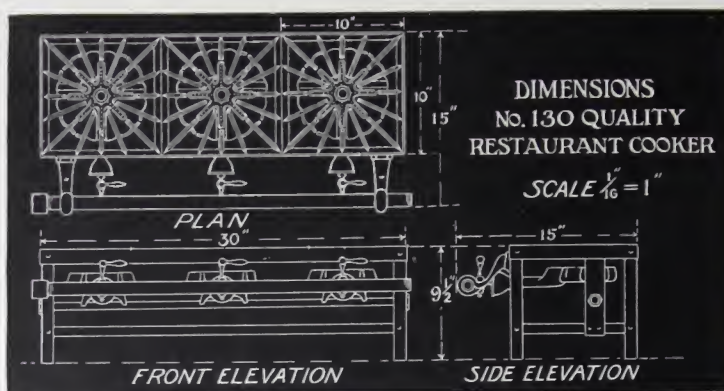

No. 1846

Quality Restaurant Cookers

THESE Cookers are designed for short-order or heavy-duty work where ovens are not desired. They require little space and can be furnished with a stand or used on counters—a size is made to fit any and all needs. They are of heavy construction, in plain finish (nickel finish on order). With ordinary gas pressure of about 28/10ths, the 6-inch burner consumes about 20 feet per hour and the 8-inch burner about 40 feet per hour. This consumption can be increased for quick work if desired. The top grates used over all 8-inch burners are 13½ inches square; over the 6-inch burners, 10 inches width and 13½ inches depth, except on Nos. 110, 120, 130 and 140, on which grates are 10 inches by 10 inches. All 8-inch burners have a separate simmering burner.

FOR DIMENSIONS, see Pages 54 and 55

|------|---|------|----------------------------|
| 75. | Back portion of top | 95. | Dust flue div. plate |
| 76. | Front portion of top | 96. | Wedge for water-back |
| 77. | Main front | 97. | Dust damper |
| 78. | Left side of body | 98. | Dust damper rod |
| 79. | Right side of body | 99. | Side fire brick |
| 80. | Main back | 100. | Front fire brick |
| 81. | Main bottom | 101. | Back fire brick |
| 82. | Ash pit door | 102. | Angle iron leg bracket |
| 83. | Ash pit door slide | 103. | Check register frame |
| 84. | Poke hole door | 104. | Check register |
| 85. | Poke hole door slide | 105. | Check register pull |
| 86. | Left side of brick rest | 106. | Draw center grate |
| 87. | Right side of brick rest | 107. | Slide of draw center grate |
| 88. | Duplex grate back hanger | 108. | Draw center grate rest |
| 89. | Duplex grate front hanger | 109. | Draw center grate shaker |
| 89A. | Ash chute strips (right and left sides) | 110. | Draw center grate hanger |
| 90. | Left side duplex grate | 111. | Draw center grate follower |
| 91. | Right side duplex grate | 112. | Left side follower keeper |
| 92. | Duplex grate cogs | 113. | Right side follower keeper |
| 93. | Duplex grate shaker | 114. | Ash pan |
| 94. | Cast iron water-back | | |

A. G. A. Construction in Gas Ranges

A NUMBER of gas ranges have been placed on the market recently—of good appearance, but inferior construction. Some of these are so poorly built they cannot possibly give satisfactory results, either as an efficient cooking apparatus or for durability and long life.

Inasmuch as these ranges are of good appearance, and the features making for economy in gas consumption, uniform baking, etc., can, perhaps, be detected only by an experienced eye, we deem it well to refresh our memories on what A. G. A. construction really means.

The American Gas Association specifications are not a compilation of eccentric notions, but the sound, deliberate reasoning of America's best gas engineers; published for the protection of the purchaser unfamiliar with the details of gas range construction.

By way of comparison, we have purchased one of the many inferior ranges offered for sale, and are herewith submitting a detailed summary, point for point, of this range as compared with our No. 1837 Quality.

Full Specifications on following three pages

No. 1837 QUALITY CABINET GAS RANGE

Built to A. G. A. Specifications

X-Y-Z CABINET GAS RANGE

Inferior Construction

WEIGHT

Net 180 lbs. Net 153 lbs.

DIMENSIONS

Length—Less End Shelf..... 42 in.	Length—Less End Shelf..... 44 in.
With End Shelf..... 45 in.	No End Shelf on Range
Height..... 48 in.	Height..... 50 $\frac{3}{4}$ in.
Depth (Less Manifold)..... 22 $\frac{1}{2}$ in.	Depth (Less Manifold)..... 21 $\frac{3}{4}$ in.
Cooking Top Opening..... 20 x 20 in.	Cooking Top Opening..... 19 x 19 in.
Baking Oven..... 16 x 18 x 12 in.	Baking Oven..... 16 x 18 $\frac{1}{2}$ x 13 $\frac{3}{4}$ in.
Broiling Oven..... 16 x 18 x 9 in.	Broiling Oven..... 16 x 18 $\frac{1}{2}$ x 9 $\frac{1}{2}$ in.

SHEET METAL

24 gauge—3 pass steel—baked japanned. 26 gauge sheet iron—not japanned.

OVEN LININGS

Insulation:

Sides: dead air space..... $\frac{1}{2}$ in.
Sides: flue..... 1 in.
Back: air insulation and flue..... 1 $\frac{1}{8}$ in.
Top: air insulation and flue..... 1 $\frac{3}{8}$ in.
Weight: one side lining—24 gauge—7 lbs. 7 ozs.

Linings: flues and baffles provide ample insulation and insure even distribution of heat.

Linings easily removable and held in place without bolts.

Insulation:

Sides: dead air space..... None
Sides: flue..... 1 $\frac{1}{2}$ in.
Back: air insulation and flue..... None
Top: air insulation and flue..... $\frac{1}{2}$ in.
Weight: one side lining—26 gauge—3 lbs. 3 ozs.

Linings: provide no insulation and make no provision for distributing heat.

There is no *back lining* whatever.

Side linings not removable.

BURNER BOX LINING

Sides and back made of 24 gauge galvanized iron.
Easily removable for repairs.

No back lining—sides made of 26 gauge black iron.

OVEN TOPS

Outside Top..... 18 gauge
Broiling Oven Top (or Baking Oven Bottom)
weight, 8 lbs. 3 ozs.

Built of 2 sheets of 18 gauge steel, with dead air space insulation.

Outside Top..... 26 gauge
Broiling Oven Top (or Baking Oven Bottom)
weight, 3 lbs. 4 ozs.

2 sheets of 26 gauge sheet metal are used, with no dead air space insulation, and a sheet of 1-32-inch asbestos is loosely inserted.

No. 1837 QUALITY CABINET GAS RANGE

Built to A. G. A. Specifications

X-Y-Z CABINET GAS RANGE

Inferior Construction

EXTREME BOTTOM

Readily removable as one piece.

Not removable—bolted in.

OVEN RACK SUPPORTS

Corners rounded to prevent cutting hands. So formed as to support the racks firmly with two thicknesses of 24 gauge sheet iron.

Sharp corners—liable to cut hands. Racks supported by single thickness only—supports easily bent.

FLUE COLLAR

So ventilated that the placing of a vessel over the collar will not prevent the oven products from escaping.

Flue collar not ventilated—a vessel placed on the collar would smother oven burners.

DOORS

Both doors have springs.

Broiler door has no spring or counter-balance.

Both doors flush.

Broiler door not flush with inside surface.

Possible to observe oven burner without opening either baking or broiling oven door.

Lining of broiler door has no openings—not possible to observe burner.

TOP GRATES

Weight..... 5 lbs. 2 ozs.

Weight..... 4 lbs.

Top surface 3-16 in. above level of top frame, thus supplying ample ventilation and secondary air to burner even with large vessel in use.

Surface 1-16 in. above level of top frame.

Grates interlock firmly in center.

Grates do not interlock in center—very light and easily warped.

END SHELF

Made of cast iron.

No end shelf.

TOP BURNERS

1 giant, 3 single and 1 simmering burners.

4 single burners—no simmering.

Ports around center opening of burners drilled at an angle to prevent smothering.

Burner will smother—ports around center opening not drilled on an angle.

OVEN BURNER

Width of Loop Oven Burner..... 6¾ in.

Width of Loop Oven Burner..... 3½ in.

Too narrow to provide proper distribution of heat.

Mixer tube fastened to burner proper with threaded joint—diameter of mixer tube full ¼ in., with no obstructions. Burner and mixer tube so designed as to give maximum velocity to air and gas mixture at ports. This is to prevent back-firing.

Mixer tube fastened to burner proper with loose bolted joint—liable to leaks. Mixer tube at this point reduced to ⅜ in., thus impeding the velocity of the air and gas mixture, and preventing proper combustion, also promoting back-firing conditions.

Burner easily removable.

Bolted in and not removable.

No. 1837 QUALITY CABINET GAS RANGE

Built to A. G. A. Specifications

X-Y-Z CABINET GAS RANGE

Inferior Construction

OVEN BURNER SUPPORTS

Attached to rack supports.
Burner securely sprung in place.

Attached to outside body.
No provision for securing burner in place.

OVEN LIGHTER

Oven Lighter part of burner proper, extending to within $2\frac{1}{2}$ in. of front.

None— $7\frac{1}{2}$ in. from front of range to oven burner.

AIR MIXERS

End of burners machine finished flat, so as to prevent leakage of air.

End of burners not faced flat—shutter does not fit tightly.

AIR SHUTTERS

Improved shutter has seven positive adjustments—is easily operated without removing set bolt, but cannot be moved until bolt is "unscrewed," thus preventing an accidental change of adjustment.

No provision for locking mixer cap in adjusted position.

COCKS

"Standard Gas Range Cock" used.
Barrel $1\frac{1}{4}$ in. long, with spring and washers to take up all wear.
Exposed parts nickel-plated.
Oven burner cock handle of flat metal, distinguishing design and marked "oven."

Cock not of approved standard type.
Barrel $\frac{3}{4}$ in. long—no provision made for taking up wear.
Exposed parts not nickel-plated.
Oven burner cock handle same as top burners.

MANIFOLDS

Made of $\frac{3}{4}$ in. extra heavy pipe.
Polished ells and caps.
End manifold support of cast iron, securely fastened.

$\frac{1}{2}$ in. standard iron pipe.
Ells and caps not polished.
End manifold support of sheet iron, loose fitting.

BURNER TRAYS

24 gauge—die stamped—tight corners, amply large to catch all drippings.

26 gauge—hand formed with open corners. Not of sufficient depth to catch drip; $\frac{1}{2}$ in. too short, leaving opening at front.

OVEN RACKS AND BROILING PAN

2 Oven Racks.
Broiling Pan 24 gauge, size 16 x 16.

1 Oven Rack.
Broiling Pan 26 gauge, size 16 x 11.

PLATE SHELF

Rigidly fastened with special casting.
Plate Shelf ventilated.
Made of 26 gauge, 3 pass polished steel.

Poorly supported—fastened to oven side with but one bolt.
Not ventilated—will rust on under side and throw steam from foods in cook's face.
Made of 26 gauge, 1 pass plain black steel.
